

Refrigerant Pricing – Prices subject to change at any time

HVAC Parts & Supply has developed relationships with refrigerant suppliers in an effort to meet our refrigerant needs now and in the future. As the supply of R22 diminishes, we should remain in a position to fulfill the demand of our current customer base. Although we may need to limit the quantity of the gas sold at a given price level, we believe we will be in a position to offer a higher volume at an adjusted cost. If you need volumes higher than the announced allocation, please contact Martin Soderlund or Brenda Wintheiser. We look forward to serving you!

These part numbers are to be used if you want to ship the refrigerant direct to your customer.

Beginning 10/1/17 refrigerant purchases will no longer accrue MAF/PPF dollars or count towards your year-end goal attainment and rebate payout.
