Parts: 10 years, no registration required

RATINGS:
AHRI ratings available at
AHRIDirectory.org

We are happy to announce 5 new TEM4 models that provide a competitively priced solution for 15-16 SEER ratings. These new models feature a CTM ECM multi-speed motor for single stage system matches with 4TTR6 for cooling and 4TWR5/4TWR6 for Heat Pump applications.

These new models have all the same features you already know with the TEM4 products including:

- The cabinet is multi-position for cooling and heating applications so that the same unit can be used in a variety of applications and minimizes inventory
- Less than 2% leakage, which allows the unit to operate without pulling in excess unconditioned air.
- Interior composed of cleanable foil-faced insulation with captured edges so no fiberglass is exposed in the air stream
- Double-sloped drain pan to ensure full condensate drainage, which helps minimize the opportunity for microbial growth.
- All-aluminum coil
- Factory installed TXV
- Compatible with our current BAYHTR15/35 electric heaters
