WARRANTY INFO

Registered Limited Warranty

- 10 years

Non-Registered Limited Warranty

- 5 years

Trane is excited to announce an upgrade to the XL850 smart connected control.

The upgrade includes the following features:

- New paint color – Designer silver (same as the TZON1050AC52ZA and TCONT824AS52DB)
- New Z-Wave plus bridge with improved range
- 4-Sided color retail packaging sleeve
- 14th character of model number changed to B

NOTE: All other features are the same as the TCONT850AC52UA.

The 850 not only enables homeowners to remotely control and monitor their indoor comfort conditions, but simplifies the process to add more than 200 Z-Wave products throughout their home— keeping them connected to what matters most: their family and home. By installing an 850 control, a home becomes smart home ready.

Homeowners may:

- Enroll more than 200 Z-Wave devices to their 850 comfort control
- Begin building their network of Z-Wave home automation products at installation and add devices later
- Add Z-Wave appliance modules, dimmer modules, comfort controls, locks, window, door and motion sensors

All the above may be controlled through Nexia™ smart home system from any Internet-enabled smartphone, tablet, or computer. Dealers may also enroll the 850 controls to Nexia Diagnostics after receiving homeowner approval to remotely monitor their customers' HVAC system to ensure optimal performance.

850 Model Number	TCONT850AC52UB
