

Trane 95% Furnace Updates

eTPB2113 | April 28, 2021

IMPORTANT DATES

First Production:
May 3, 2021

First Ship:
As current models are depleted.

Pricing:
Available Now

Warranty:
10 year parts/Limited
Lifetime heat exchanger

RATINGS:
AHRI ratings available at
AHRIDirectory.org

Starting the week of May 3, 2021, all S9V2 and S9V2-VS furnace models will include a new, optimized heat exchanger that is designed to reduce operating noise in both liquid propane (LP) and natural gas installations.

As detailed in prior bulletins, this launch also phases out the following furnace models: S9V2B060U3PSBB, S9V2C100U4PSBB, S9V2C100D4PSBB. AHRI ratings are in the process of being expanded to ensure that any system rating gaps created by this consolidation are filled. New B060 and C100 ratings will include the 14th digit of the furnace's model number to indicate the unit's expanded airflow control capability.

The chart below details the models that are phasing out as well as their replacement. Orders will be superseded to the new model as units become available. Orders placed on models that are phasing out will be fulfilled based upon unit availability.

All models are subject to current lead times.

We are very excited to share these changes and look forward to the continuation of another great year!

Product Family	Current Model	New Model
S9V2	S9V2B040U3PSBB	S9V2B040U3PSBC
S9V2	S9V2B060U3PSBB	S9V2B060U4PSBC
