

4PXC & 4TXC Update

eTPB2119 | June 25, 2021

IMPORTANT DATES

First Production:
Effective Immediately

As we continue to build a more resilient supply chain for coil manufacturing, we have shifted production of 4PXCBU36BS3HAA to Vidalia under new model number **4PXCBU36BS3HAB** as planned. The primary benefit of this move is to drive incremental capacity for all coils which will continue to bring improved availability in 2021 and beyond.

Things to note on 4PXCBU36BS3HAB:

- All remaining unfulfilled customer orders against 4PXCBU36BS3HAA will be transitioned to **4PXCBU36BS3HAB**, no action is needed from you on this
- If you have open orders that will be impacted by this, you will be notified

WARRANTY:

**Non-Registered Limited
Warranty:**
10 years

Secondly, as promised, we're happy to communicate that production of painted 4TXCB004DS3HCB has begun in Vidalia. Reminder there **will NOT** be a model number change.

Things to note on 4TXCB004DS3HCB:

- Model number will not change with painted cabinets
- Purple sticker will no longer be present once you begin receiving painted version
- There will be a short period of time where unpainted & painted coils both exist in inventory, and the unpainted coils will be used first to fulfill orders. We anticipate this to be cleared within a few weeks.
