LAUNCH UPDATE:

We are rapidly approaching the completion of our transition to a fully FER-compliant Ameristar lineup. Unfortunately, the first order and first ship dates of two of our new Ameristar furnace families – A801X and A951X – have been delayed.

For more details on this delay and the impact on first order and first ship dates, please reference the dates above. Models that are being impacted by this schedule change can be found in the charts to the right.
