Parts: 5 years / Heat Exchanger: 20 years
- ▶ **REGISTERED WARRANTY:**  
Not applicable

We're excited to announce the launch of Ameristar's new single-stage condensing furnace family, A951X. This new gas furnace family is a great addition to the Ameristar product line with its many new features and innovative functionality options. With a cabinet that is certified to be 1.4% air leakage compliant, an Energy Star® certification, and up to 96% AFUE on many models – this model family is a

great option for high-efficiency, single-stage installs.

**Ameristar's M951P model family will cease production on July 2, 2019.** Orders placed on this model family will be fulfilled based upon unit availability. For a list of models that are phasing out, along with a suggested A951X replacement, please see the chart shown.
