Ameristar is excited to announce the launch of its new, two-stage gas furnace family – A952V. This model family features a low-profile 34” cabinet height, variable speed ECM blower motor, multiple venting options in each installation poise, and is certified to be 1.4% cabinet air leakage compliant. These units offer a great high-efficiency solution for lower cost installs with a 96% AFUE rating and Energy Star certification. Along with many new features and functionality options, this family has an expanded offering to better fit the needs of any job application.

**The Ameristar model family M952V will cease production on July 2, 2019.** Orders placed on models that are phasing out will be fulfilled based upon unit availability. For a list of models that are phasing out, as well as a suggested A952V replacement model, please see the chart below.

Model Number	Input BTU/h (Second Stage)	Height	Width	Depth
<b>UPFLOW</b>
