Ameristar AC and HP Systems and TMM4/TMM5 Air Handlers

In an effort to avoid any confusion, please note that the new GMU/V Over the Water Heater, Stud and Wall Mount Air Handlers are not currently rated with Ameristar.

Ameristar ratings with the GMU/V series will not be in place until the start of the 2020 season.

For the 2019 season, you must continue to use the TMM4 and TMM5 air handlers for any Ameristar air conditioning or heat pump system ratings combinations.

Please continue to order the TMM4 and TMM5 air handlers to cover your needs for Ameristar matched systems during this time.

In addition, due to the lead times involved with the TMM4/TMM5 products, please let us know if you have any large jobs forthcoming. Your assistance would be greatly appreciated to ensure that we have the inventory available.

If you have any questions or need to discuss further, please contact us.

Model Family	Model Number	Dimensions	Refrigerant Control Device	Motor Type	Front & Bottom Return Applications Supporting	Airflow Direction
		H x W x D				
TMM4	TMM4A0A18S21SA	36.5 x 20.5 x 15	Orifice	PSC	Cooling & Limited Heating	Upflow Only
TMM4	TMM4A0A24S21SA	36.5 x 20.5 x 15	Orifice	PSC	Cooling & Limited Heating	Upflow Only
TMM4	TMM4A0B30S21SA	39.5 x 22 x 19	Orifice	PSC	Cooling & Limited Heating	Upflow Only
TMM4	TMM4A0B36S31SA	39.5 x 22 x 19	Orifice	PSC	Cooling & Limited Heating	Upflow Only

Model Family	Model Number	Dimensions	Refrigerant Control Device	Motor Type	Front & Bottom Return Applications Supporting	Airflow Direction
		H x W x D				
TMM5	TMM5A0B24M21S	39.5 x 22 x 19	TXV	ECM	Cooling & Heating	Upflow Only
TMM5	TMM5A0B30M21S	39.5 x 22 x 19	TXV	ECM	Cooling & Heating	Upflow Only
TMM5	TMM5A0B36M31S	39.5 x 22 x 19	TXV	ECM	Cooling & Heating	Upflow Only
