

RunTru 95% Furnace Updates

eRTPB2105 | April 28, 2021

IMPORTANT DATES

First Production:

May 3, 2021

First Ship:

As Current inventory is depleted

Starting May 3, 2021, A952V furnace models will include a new, optimized heat exchanger that is designed to reduce operating noise in both liquid propane (LP) and natural gas installations.

As detailed in prior bulletins, this launch also phases out the following furnace models: A952V060BU3SAB, A952V100CU4SAB, A952V100CD4SAB. AHRI Ratings are in the process of being expanded to ensure that any system rating gaps created by this consolidation are filled. New B060 and C100 ratings will include the 14th digit of the furnaces' model number to indicate the unit's expanded airflow control capability.

The chart below details the models that are phasing out as well as their replacement. Orders will be superseded to the new model as the units become available. Orders placed on models that are phasing out will be filled based on unit availability.

Pricing Info:

Available Now

All models are subject to current lead times.

WARRANTY:

- 5 year limited parts
- 10 year registered
- 20 year Heat Exchanger

We are very excited to share these changes and look forward to the continuation of another great year!

RATINGS:
