

14 & 16 SEER Compressor Changes

eTPB2138 | Nov. 19th 2021

IMPORTANT DATES

First Production:

Dec. 20th 2021

First Ship:

Will begin after current inventory has been depleted.

Sales Literature:

Available

Technical Literature:

Available

Pricing Info:

Available

WARRANTY:

No changes

RATINGS:

AHRI ratings available at AHRIDirectory.org

Increased demand is placing strain on compressor supply. To ensure stable production and to improve product lead times, we will be using different compressors in the model numbers in the grid below. These new compressors have a higher availability and will help alleviate some capacity constraints.

Note the new model numbers listed below:

Current Production Model # (From)	New Model # (To)	Replacement Part Number	Production Start
4TTR4030L1000AA	4TTR4030L1000BA	COM12773	12/20/2021
4TTR4031L1000AA	4TTR4031L1000BA	COM12773	
4TTR6030J1000AA	4TTR6030J1000BA	COM12773	
4TTX6030J1000BA	4TTX6030J1000CA	COM12773	

Important Notes:

- There will be no change in AHRI Ratings between old and new models. AHRI ratings stop at the 9th model digit which is unchanged between the new and old models.
- Replacement parts lists are complete and available in the system.
- Pricing between the new and old model numbers are the same.
