Odyssey Split System Changes

Beginning in September there will be two changes to the Odyssey split systems:

1. Odyssey split systems will no longer ship with factory installed service valves.
2. R-22 TTA units will be switching to Micro-channel condenser coils like the R410a versions of the TTA.

IMPORTANT DATES

8/23 – last order date for current TTA/TWA models

8/27-9/7 – orders for non-stock units will need to be held and reconfigured with the new model number OR check for availability of the design sequence “A” units

9/10 – First order for new units

9/25 – First Shipment of new units

RATINGS INFO

AHRI ratings available at www.ahridirectory.org

WHY THIS MATTERS TO YOU:

- The minor design sequence (digit 11) will be **changing to “B”** for R410 TTA/TWA units and R-22 TWA (see table on this page)
- The major design sequence (digit 10) will be **changing to “B”** for R22 TTA units (all other TTA/TWA units digit 10=A)
- Service valve kits can be added as a field installed accessory (see following page for model numbers)

Be sure to check inventory for existing “des. seq. A” units that are available for immediate shipment (des. seq. A will remain selectable in TOPSS for ease of ordering units from inventory)

		TTA		TWA	
Refrigerant	Digit 7	2	4	2	4
Major Design Sequence	Digit 10	B	A	A	A
Minor Design Sequence	Digit 11	A	B	B	B

(major des seq, digit 10=B) - Change from fin/tube coil to MCHX, Service valve(s) omitted

(minor des seq, digit 11 = B) - Service valve(s) omitted
