

Builder Series Furnace Door Change

eTPB2218 | May 5, 2022

IMPORTANT DATE

Estimated First Production Date:

June 1, 2022

As part of simplifying our manufacturing processes and product lines for streamlined production, we are changing the builder-series door design on our S8B1 and S9B1 product families. Our current builder series furnaces will be transitioned to utilize the door design found on S8X1 and S9X1 furnace families, pictured below.

This change will not impact unit model numbers, system ratings, furnace performance, or any other functional aspect of our builder series furnaces.

Since this is a running change with no model number updates, no order line supersessions need to take place. Units with the new door design will arrive as old material is exhausted and new material is made available. Current production timelines place this transition as approximately June 1, 2022.

Current S8B1

Future S8B1

Current S9B1
