10 Year Functional Parts

20 Year Heat Exchanger

We are excited to share the details on upcoming upgrades within the A801X furnace family. Starting January 11, 2021, all 17.5", 80,000 BTU/h and 24.5", 120,000 BTU/h models will include a new, improved heat exchanger design. This design is optimized to reduce burner operating noise in both liquid propane (LP) and natural gas applications.

The chart below details the models that are phasing out with these changes, as well as the models that will replace them. Orders will be superseded to the new model as units become available. Orders placed on models that are phasing out will be fulfilled based upon unit availability.

Remaining models in the A801X family will receive a similar design upgrade in April of 2021.

OLD Model	NEW Model
A801X080BM4SAC	A801X080BM4SBA
A801X120DM5SAC	A801X120DM5SBA

OLD Model – California Only	NEW Model – California Only
A801X080BM4TAC	A801X080BM4TBA
A801X120DM5TAC	A801X120DM5TBA
