

Trane 80% Furnace Updates

eTPB2114 | June 14 2021

IMPORTANT DATES

First Production:

June 14, 2021

First Ship:

As current models are depleted.

Pricing:

Available Now

Warranty:

10 year parts/20 year heat exchanger

We are pleased to announce upgrades to the S8B1, S8X1, and S8X2 furnace families beginning June 14, 2021. These upgrades introduce a new heat exchanger design that is optimized to reduce burner operating noise in both liquid propane and natural gas installations.

This launch also consolidates the 17.5", 60,000 BTU offering in these families. As shown in the chart below, existing orders with 60,000 BTU three-ton model(s) that are phasing out will be superseded to the four-ton offering. Orders placed before June 14, 2021 on B060 3 ton models will be superseded to the 4 ton B060 offering while maintaining current pricing. B060 4 ton pricing has been adjusted to help accommodate this transition, and all orders placed on or after June 14, 2021 will see the appropriate price change.

AHRI ratings are in the process of being expanded to ensure that any system rating gaps created by this consolidation are filled.

The chart on the following page details the models that are phasing out as well as their replacement. Orders will be superseded to the new model as units become available. Orders placed on models that are phasing out will be fulfilled based upon unit availability.

All models are subject to current lead times.

RATINGS:

most ratings available now; remaining ratings to be published by 6/18/21
