AHRI ratings available at AHRIDirectory.org

We're pleased to announce that the Trane®/ Mitsubishi Electric branded P-Series products are available to order.

You will need to use new model numbers when placing orders.

****New quotes for P Series units on or after January 11 will be using the new SKUs.** All existing/pending orders will have until the end of January to get entered and must ship by end of February using the old METUS SKUs.**

Three outdoor unit types:

- Cooling Only units provide 100% cooling capacity down to -40°F ambient temperature (wind baffles required for low ambient operation)
- Heat Pumps offering a wide heating and cooling operation range
- Hyper-Heating Heat Pumps providing 100% heating capacity at 5°F and guaranteed heating down to -13°F outdoor ambient temperatures

Model change prefix run down:

- PUY – TRUY (Cooling only)
- PUZ – TRUZ (Standard inverter outdoor unit)
- PUZ-HA – TRUZH (Hyper-Heating Inverter® outdoor unit)
- PKA – TPKA (High Wall mount ductless indoor unit)
- PCA – TPCA (Ceiling mount ductless indoor unit)
- PLA – TPLA (4 way Ceiling Cassette coil / motor chassis)
- Requires TLP-41EAEU decorative panel
- PEAD – TPEAD – Mid Static Horizontal Ducted indoor unit
- PVA – TPVA – Convertible Ducted Indoor Unit

Submittals and manuals are available on Trane.MyLinkDrive.com. For more information, please contact your local METUS representative
