

New Lower Pricing for GMU/V and A4MX

eRTPB2113 | October 12, 2021

What's Happening:

Late last year we eliminated some lower volume product to provide more capacity for higher volume products while also reducing complexity in our product offering. Manufacturing of these products ceased in the January 2021 timeframe. We still have some inventory on these products, so we are lowering pricing to help sell them.

Why this matters to you:

New pricing is updated and available in the system. Once inventory is depleted, the products will no longer be available.
