- S9X2 – PSB Models
- S9X1
- S9B1
- A952V
- A951X

▶ **KIT MODEL NUMBERS:**

See table

FER Coil Kits will be available soon! These kits are to facilitate the combination of Trane and Ameristar FER compliant, condensing furnaces with 4GXC and 4MXC evaporator coils. The MAY*FERCOLKITA kits come with a metal heat shield, installation instructions, and required items for install. Kits are available in each coil cabinet size and *must be used when installing a 4GXC or 4MXC with one of the listed furnace families.*

Note that this does not affect Trane or Ameristar non-condensing furnaces, legacy condensing furnaces, or condensing downflow models.

Please reference the FER Coil Kit announcement by clicking [here](#) for more information on when an FER Coil Kit must be used. Installer’s Guides and Service Facts will be updated to reflect this information and can be found on Comfortsite.

KIT MODEL NUMBER	ASSOCIATED COIL SIZE
MAYBFERCOLKITA	B WIDTH
MAYCFERCOLKITA	C WIDTH
MAYDFERCOLKITA	D WIDTH
